Fall Planting Invitation

Now is the time for leisurely planting of Wild Flowers and Ferns, described in the new Catalogue herewith. Transfer is more convenient while the plants are sleepy and the weather settled, than in the hurry and uncertainty of awakening Spring. Your Wildings will have the Fall and Winter to adapt to their new soil and climate conditions, and may reward your patience with sturdy Spring growth and earlier blooming. Brighten shady nooks in the garden and bring woodland beauty to your very doorstep. Some plants yield brilliant berries through the Winter — and the hungry birds appreciate them! We offer you our service. No order too small.

James Loder Park, Proprietor.

Fall Planting Invitation

Now is the time for leisurely planning of Wild
Flowers and Ferns, described in the new Catalogue
herewith. Transfer is more convenient while the
plants are cheap and the weather settled than in the
hurry and uncertainty of awakening Spring. Your
Wildings will have the Fall and Winter to adapt to
their new soil and climate conditions, and may reward
your patience with early Spring growth and earlier
blooming. Lighten shady spots in the garden and
bring woodland beauty to your very doorstep. Some
plants will flourish better through the Winter — and
the hunter's spirit appreciates them! We offer you the
best for order too small.

— James Under Park, Proprietor —
